"title": "Australia: SMS Guidelines",  
"body": "Australia: SMS Guidelines MCC: 505Dial code: 61There are strict measures in place to help combat spam. As such all commercial traffic should be compliant according to the Australian Spam Act 2003.Mandatory registration of Alphanumeric Sender IDs has been implemented by the Australia Communications and Media Authority (ACMA), this, as part of a recent update on their SPAM Act.Effective May 8th all messages sent with non-registered Alphanumeric Sender IDs will be blocked.Information on Alphanumeric Sender ID registration: - Please complete the attached form and return to alpha\_sender\_id@telnyx.com, along with a copy of your Business Registration. - Companies must have a valid business case for the requested Alphanumeric Sender ID. If the relationship between your company/brand and the requested Alphanumeric Sender ID

is not clear, please provide additional supporting documentation detailing your business case. - In case that the registration is being made on behalf of a customer, a signed LOA (letter of Authorisation) needs to be provided to confirm the legitimacy of the request. Additional recommendations: - Consent (Proof for Opt-in) should be obtained before sending any communications, i.e. Marketing SMS - Traffic should include clear Opt-Out options. Please make sure to always refer to our Acceptable Use Policy for Messaging. For more information on Alpha Sender ID registration kindly reach out to [alpha\\_sender\\_id@telnyx.com](mailto:alpha_sender_id@telnyx.com).",

"title": "France: SMS Guidelines",  
"body": "France: SMS Guidelines MCC: 208Dial Code: 33Alphanumeric Sender IDs are supported and will be maintained, no registration is required. Telnyx advises on the use of Alphanumeric Sender IDs for all A2P traffic towards this destination. When sending towards MVNO NRJ (20826) and Truphone (20812) Alphanumeric Sender IDs will be replaced by either a random local number or a Short Code. Local Operators do not allow marketing/promotional traffic to be sent on Sundays and French Public Holidays, between 10 pm and 8 am. Any messages attempted during this time will be queued and delivery will be attempted afterwards. All marketing/promotional traffic should include a clear option to opt-out as part of the message content. Fragment STOP au 36179 must be added at the end of the message. If missing, this will be added automatically. Anti-Phishing measures: In an attempt to fight the increase in SMS Phishing and Fraud attempts, French operators have implemented an additional check (Whitelisting) on a group of Alpha Numeric Sender IDs. Traffic using the aforementioned Alphanumeric Sender IDs will only be possible through the submission of a duly signed Letter of Authorization. Please make sure to always refer to our Acceptable Use Policy for Messaging.",
